Interactive Classic

Available in 60", 75", 80" & 90"

The Classic Range of touchscreens remains Australia's favourite classroom touchscreen. Classic good looks, including a sturdy aluminium frame, toughened glass and rock-solid reliability makes the Classic Range a winner every time.

Greater Speed & Accuracy

Combining Infra-Red and camera technology, the Classic touchscreens are incredibly responsive and accurate. Incorporating multi-touch technology and gesture recognition there is no question why CommBox Touchscreens are replacing projectors and interactive whiteboards within classrooms and boardrooms both domestically and internationally.

Impressive from all Angles

All Classic touchscreens incorporate the highest Commercial Grade HD LED displays, rewarding the audience with superior image quality, excellent viewing angle and brightness. Paired with toughened Anti-Glare glass, which provides unmatched visibility from all angles of any light-filled room.

Plug & Play

Connect a Windows PC, Mac or laptop and interact immediately – No Drivers, no calibration required. CommBox Interactive touchscreens are truly plug & play. A Classic touchscreen comes ready to use straight out of the box, reducing installation time and costs.

A Smarter Investment

By utilising only the highest quality components a CommBox Touchscreen has a 17 year lifespan and does not require maintenance or replacement lamps.

The current Classic range has been further developed and now features stylish rounded corners, improved sound quality, increased inputs and an even sharper image.
