Get work done with BenQ

BenQ understands business. For the last 36 years, our enterprise-grade projectors and monitors have been helping companies get ahead of the curve. Over the last decade, we've branched out to develop and deliver even better display solutions that are designed to boost productivity and improve the utility of your existing workspaces. More than just your standard TV or signage, BenQ's corporate interactive and non-touch displays come with innovative hardware and software features that help you work smarter and enhance the quality of your output.

Future-proof your business

Change is inevitable. The question is, are you ready for it? For your organization to thrive amid challenges, your teams need to be equipped with flexible and agile solutions that allow them to quickly shift to more resilient working modes such as hybrid working for better business continuity.

Cover all the bases

Whether you’re planning to give your entire office an upgrade or just looking to furnish your meeting rooms, BenQ offers a complete solutions portfolio that covers all types of display needs. From eye-catching lobby signage, to high-quality video streaming setups, to interactive displays for hands-on coworking, we’ve got you covered.

Team up with industry leaders

BenQ display solutions are partnered with and certified by other industry leaders such as Microsoft, Amazon, and VMware, among others, guaranteeing exceptional performance and compatibility.

BenQ Display Partners »

Our corporate solutions

Explore what BenQ can offer enterprises. More than just monitors or projectors, we provide display solutions that effectively transform the way you work.

Interactive displays

Push the limits of collaboration with touchscreen displays designed for real-time coworking in face-to-face and hybrid setups.

Corporate displays

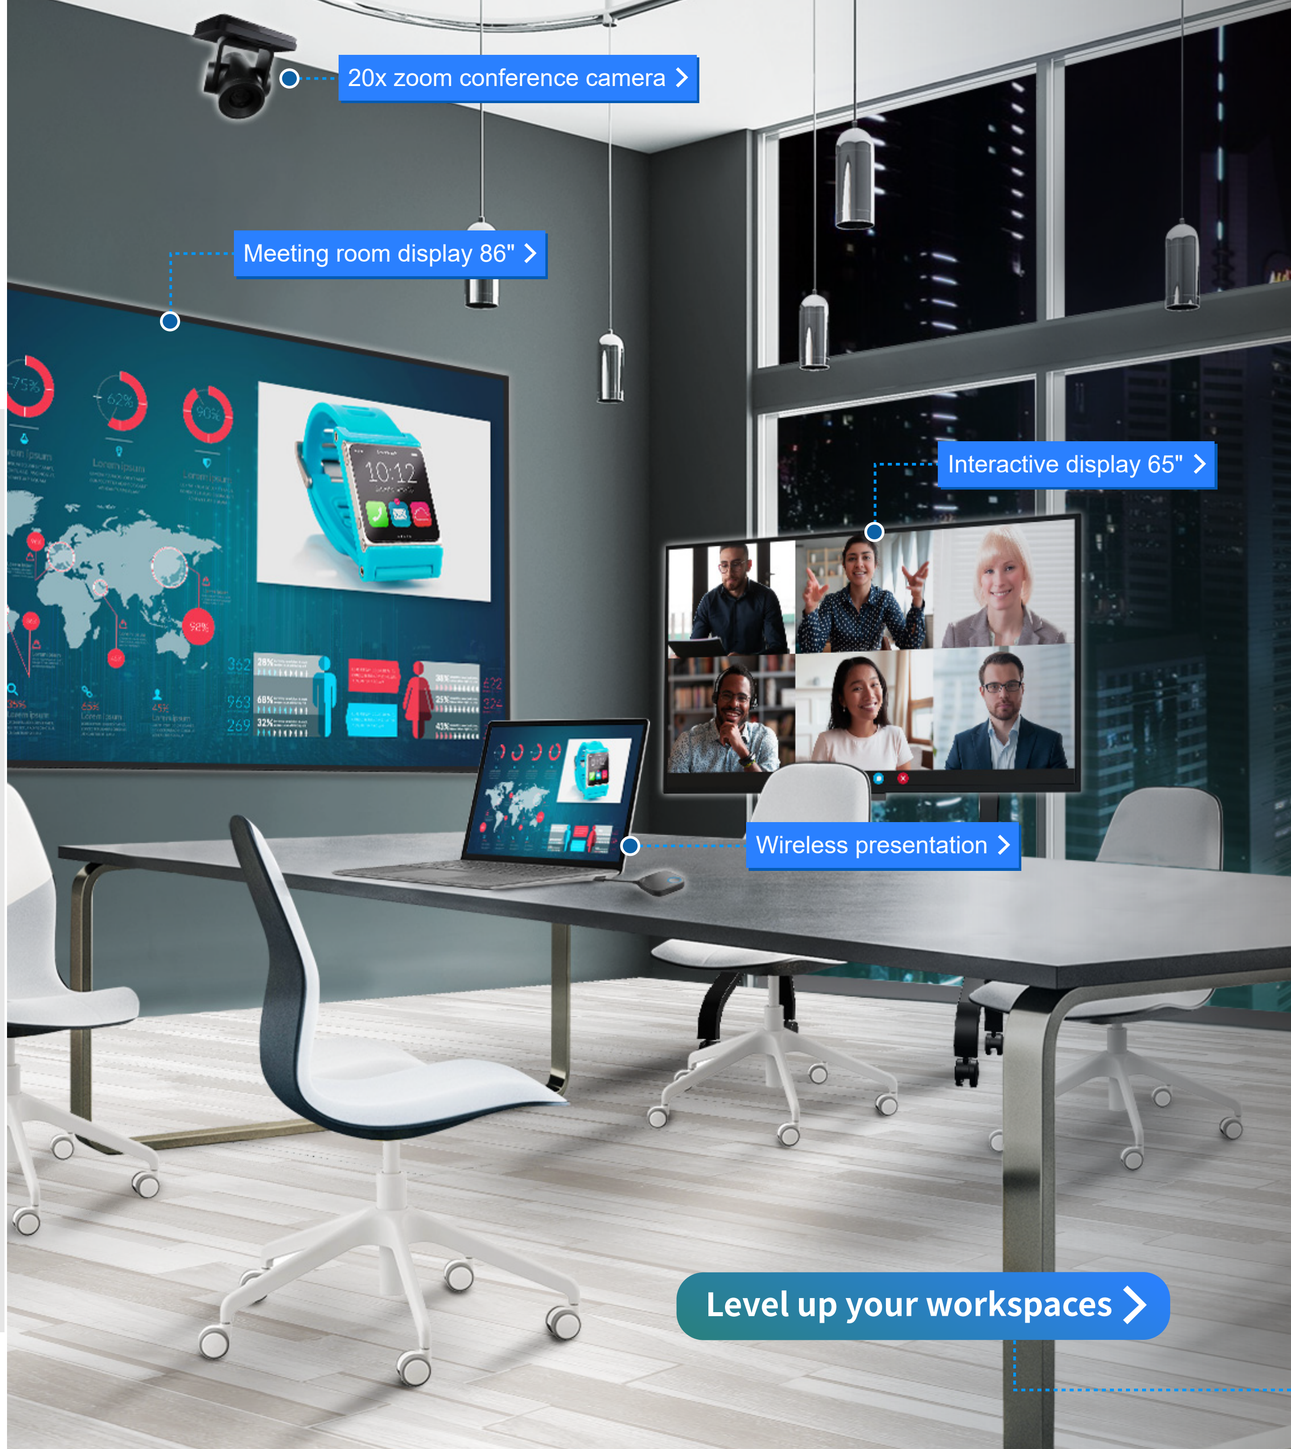
For digital office signage or large-format meeting room screens, BenQ's corporate displays are designed for versatility.

Accessories

Extend the potential of your BenQ displays with add-ons that fulfill your most rigorous requirements.

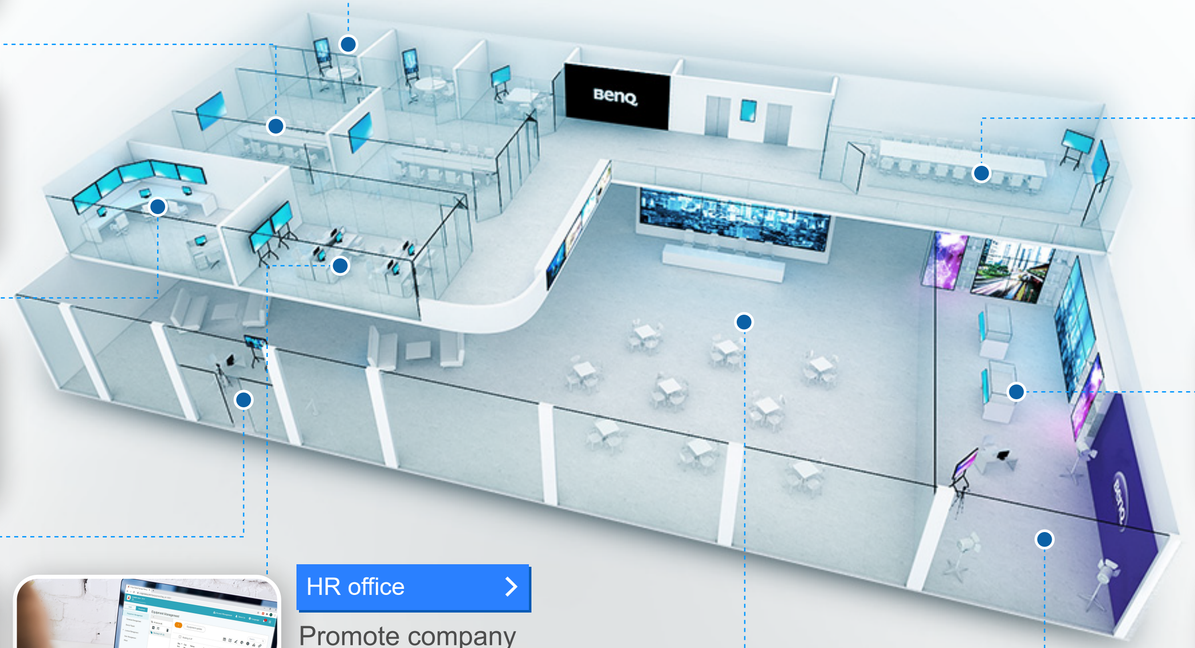
Software

With accessible apps and platforms purpose-built for collaboration and management, everything you need is at your fingertips.



Level up your workspaces

BenQ offers a complete portfolio of enterprise-grade solutions that improve office spaces designed for different work scenarios.



Huddle room

Have the freedom to explore ideas to the fullest in spaces designed for hands-on collaboration.

Meeting room

With fully equipped rooms for presentations and conferencing, just walk in and start meetings instantly.

IT control room

Monitor and manage enterprise assets with ease through an expansive live dashboard.

Entrance

Protect the well-being of your employees and guests through no-contact temperature screening.

HR office

Promote company advocacies and keep employees informed via a centralized broadcast system.

Conference room

Get down to business without the fuss using professional display solutions for hybrid meetings.

Show room

Sleek, color-calibrated displays and installations allow you to flaunt your finest products.

Demo room

Host live demos and Q&As to reach more customers in real time via high-quality live streaming.

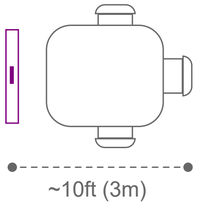
Lobby

Impress guests with larger-than-life video walls that show off the best your company has to offer.

Huddle room

small spaces for big ideas

Display Camera



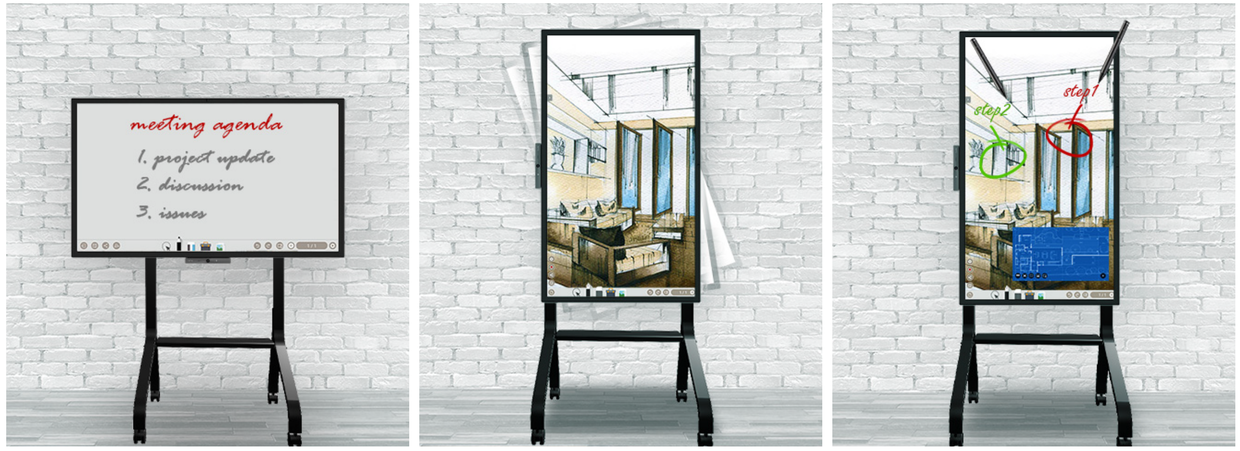
Accommodates
< 5 people

Viewing distance
~ 10ft (3m)

There’s really no telling when a breakthrough will hit you. And when it does, you need to be ready to capture it and refine it with your peers.
Perfect for quick ad hoc meetings and impromptu brainstorming sessions, huddle rooms fitted with interactive touchscreen displays let coworkers explore ideas freely through cloud whiteboarding and other collaborative features.

CP product video

EZWrite



Next-level whiteboarding

Do more than just write. The BenQ DuoBoard comes with EZWrite, a cloud whiteboarding solution that allows multiple users to write or sketch on the same board at the same time, either directly on the DuoBoard or from their own mobile devices. EZWrite also allows you to extend your writing surface, import photos and screenshots, and record your sessions.

Learn more »

EZWrite

Work that moves with you

Don't get stuck when you're on a roll. Mounted on the BenQ rotating display trolley, the DuoBoard becomes mobile. If ever you need to switch spaces, you can easily take your work with you and continue where you left off. And since the frame rotates up to 90°, you can whiteboard in portrait mode and see things from a different angle—literally.

Available Q2 2021

TTY21

Everything at a glance

Need to have multiple apps or files open for a project? Decrease the time it takes for you to keep switching from one window to another. Conveniently work on two apps at once using either the Duo Windows or Duo OS mode. Viewed on a large-format enterprise display such as the BenQ DuoBoard, you and your team can have more space to see all the details.

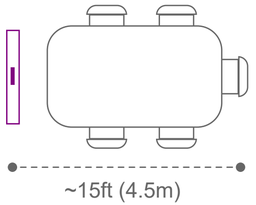
DVY21

Meeting room

mid-size rooms for any purpose

Display Camera



Accommodates
< 10 people

Viewing distance
~ 15ft (4.5m)

The most common of all office spaces, meeting rooms give employees a private area to share ideas, present plans, and discuss concerns with their colleagues.

Great meeting rooms allow just about anyone to walk in and start their presentations or video calls without getting bogged down by hardware or software issues. With this in mind, it's important to equip these spaces with displays designed for easy screen sharing and smooth video conferencing.

CS demo video

InstaShare 2

Present with confidence

Focus on your meetings and BenQ will take care of the rest. Made for instant in-person and hybrid meetings, the CS has its own user-friendly OS that allows you to start video calls directly from the display or load presentations from your cloud storage accounts. You no longer need to bring laptops or USB drives. The CS also simplifies navigation and annotation. It comes with a powerful remote control that functions as a clicker and pointer.

Learn more »

CS7501

Engage more people

Get your coworkers more involved. With InstaShare, you and your peers can quickly and simultaneously cast multiple device screens on the CS. This way, everyone can actively take part and contribute to the conversation. Also, since you can split the screen into segments, it's easy for everyone to view different content. This is useful when your team needs to refer to multiple sources for an ongoing task.

Learn more »

InstaShare

Book rooms with ease

Ever had trouble finding a room for your meeting? The CS integrates with solutions like Meeting Room 365 that let you provision meeting room displays for official business. Whether your office uses Google Workspace, Microsoft Outlook, Exchange, or Office 365, all you need to do is book a room and timeslot to reserve a display. The built-in CS widget automatically shows the room schedule so everyone is up to date.

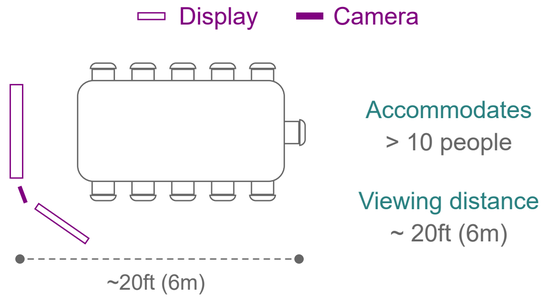
DVY22

Conference room

large rooms for hybrid workgroups



Accommodates
> 10 people

Viewing distance
~ 20ft (6m)

A state-of-the art screen in your conference room may look impressive, but is it future-proof enough to withstand the current shift to hybrid work? With large workgroups scattered across different locations, it becomes a challenge to reach a consensus. How do you gather everyone in the same room at the same time? Furnish your conference room with professional display solutions that allow you to present to peers in person while also reaching remote collaborators through video conferencing.

CP product video

Camera brochure

Meet your way

Our corporate meeting room displays are built to impress. They're 4K, durable, and look professional, but more than all that, they're also designed to match how your teams work. BenQ knows that there's no one way to hold meetings, more so hybrid meetings. Everyone has a working style that suits them best: Some get results by whiteboarding in small groups, while others get things done by presenting ideas to a large audience. In any scenario, we have displays—both touch (DuoBoard) and non-touch (CS series)—that are guaranteed to fill your meeting requirements.

DuoBoard 65”

CS8601

Capture the action

A lot of meaning is conveyed via facial expressions and body language, which are often lost when talking to remote peers. In hybrid working scenarios, where teams are scattered across different locations, it's crucial for everyone to see each other. BenQ offers a selection of video conferencing cameras that suit different kinds of meeting rooms and scenarios. Whether you're alone in a meeting pod or sharing a large conference room with your team, there's a BenQ camera that's right for you.

TeamViewer Meeting

Use the apps you have

Is your company requiring you to use Zoom Rooms, Microsoft Teams, Google Meet, Cisco Webex or other conferencing apps? With the TEY21, you can open any video conferencing software on the DuoBoard or the CS series. This OPS slot-in PC is loaded with Windows 10 IoT Enterprise, allowing you to not only use your preferred conferencing platform, but you can also open project files directly on your display. The TEY21 is easily accessible via the BenQ Launcher.

Available Q2 2021

TEY21

OPS supported software: zoomrooms Cisco webex GoTo

Demo room

streamlined showrooms

Display Camera

Traditionally, exhibitions were the best way to let people experience your products firsthand and give them an idea of what you can offer them as a company. But when meeting potential customers in person is not a viable option, your sales and marketing teams can host livestreamed demos in a multipurpose visual space that doubles as a showroom and studio. Deck out this space with a display and streaming camera that present your products in the best light.

DVY23

High-quality video streaming

Have no trouble broadcasting your demos on platforms like YouTube or Facebook Live with the DVY23 and TEY21. Combining the BenQ ST series display with a camera and OPS slot-in PC, you get the complete video streaming setup. The DVY23 is a 20x zoom conference camera with an extra wide range of pan, tilt, and zoom controls. It ensures that your presenters and products are always in focus and on screen. Its built-in gravity sensor also lets you to mount it in any position without affecting your video's quality and orientation. The TEY21 slot-in PC lets you can access web-based platforms so you can stream instantly.

Learn more »

DVY23

More than just video assist

Video assist systems are helpful in demos since they provide real-time playback of your stream, but often, VA monitors are too small, limiting the number of people who can see what's being broadcasted. With a multipurpose UHD display like the BenQ ST series, you can monitor your livestream in crisp 4K clarity. And because it's a large-format display, the director and production crew can easily spot all the nitty-gritties. There's also more space for live feedback. Sales and marketing representatives can monitor the comment stream and easily field customer questions as they come in.

ST6502

TEY21

Increased interactivity for high-impact demos

Good sales demos tell a story. Great demos captivate their audience. With the RP series, it's easier to stage highly engaging visual presentations. Its touchscreen interface allows presenters to control their slides with hand gestures and move on-screen objects around directly from the display. The RP series is also fitted with an anti-glare screen, which is ideal for studio setups that require bright lights. Product videos and presentations stay visible under any lighting condition.

DMS

Effective officewide communication

HR teams usually keep employees up-to-speed regarding corporate updates, employee benefits, training schedules, and other events via email and official portals. These blasts often get buried under other work-related threads. Make efficient use of your BenQ displays and signage when they're on standby by pushing news and company-wide announcements for everyone to see. You can easily draft and publish content using X-Sign or send out high-level alerts that need immediate action using X-Sign Broadcast.
