About Us

Established in 1976, CommBox has been leading technology innovation for over 45 years. CommBox is an Australian designer and manufacturer of a range of powerful and intuitive interactive and commercial displays, educational apps, designer AV furniture, easy-to-use digital signage and device management software.

CommBox products are approved for Australian Defence and trusted by numerous education departments, government organisations and businesses.

CommBox is passionate about creating human-centric technology, so we put the CommBox Crew at the heart of our product development. The CommBox Crew comprised of end users from Australia and New Zealand from a range of industries and technical abilities. All our products are informed, validated and tested by the CommBox Crew before launching.

CommBox collaborates with the world's leading technology partners, like Microsoft, Google, Poly, Jabra, Vivi, Clickview and more, to ensure every CommBox product works seamlessly in every meeting room, every time you use it.

CommBox seeks to wow customers in every moment, with a modern design aesthetic, superior install experience, and ongoing support delivered by the CommBox Customer Success Team.

CommBox designs and develops with collaboration in mind, helping professionals do more together than they can on their own. In every space that people meet to work together, CommBox is the very best collaboration suite you can use to connect, share, present, ideate, collaborate and communicate.

Transforming Learning

... with the CommBox Crew

All CommBox products are designed and developed in close collaboration with an international cross-sectional focus group of principals, teachers and IT managers, known as the CommBox Crew. The Crew helps CommBox to better understand the problems we are trying to solve as well as providing ongoing customer feedback and validation. This enables CommBox to build products we know customers will love.

The CommBox Crew are instrumental in ensuring CommBox remains the #1 touchscreen in Australia, New Zealand and worldwide.

Key Customers

COMMBOX
INTERACTIVE CLASSIC S4

SPECS

NEW COMMBOX OS
POWERED BY ANDROID 11

DO MORE THAN EVER BEFORE WITH THE...
CommBox Whiteboard

Enjoy the new premium CommBox whiteboard.
New advanced features include:

- Dual pens with different colour tips
- Split screen enables 4 students to use the board simultaneously
- Ruler and protractor
- Highlighter
- Sticky notes
- Tables
- Mind maps
- Curriculum aligned backgrounds
- Import PDF files and highlight key points
- Search and insert images
- Save files to your OneDrive or Google Drive or share via QR code

And much more

ANNOTATE OVER EVERYTHING
Annotate App

- Annotate over any content on the screen, operating system, tool or app with Annotate.
- Use it to take screenshots of your content on the screen and then insert it into the whiteboard.

PERSONALISE YOUR SCREEN...
with CommBox Accounts

- Log in with your Microsoft or Google Account
- Access your personalised homescreen and sidebar.
- Set the length of your session and be automatically logged out at the end of the session.
- Securely log out at any time.

INSTANT ACCESS TO CLOUD DRIVES
Cloud Drive App

- Seamlessly sign into OneDrive or Google Drive
- Access your files from the Classic S4 without needing to enter your credentials again.
- Save whiteboard sessions straight into OneDrive or Google Drive.
- Free up your laptop for other teaching tasks.

IMPROVE YOUR ON-SCREEN WORKFLOW...
with an Integrated Launcher & Sidebar

- Change the apps on the homescreen to the ones you use.
- Customise the sidebar with all your favourite apps, links or devices.
- Add your own wallpaper background.
- Change the volume and put the stand up or down using the CommBox OS control bar.
- Personalised settings are automatically saved to your CommBox Account so you can access it from any room with a CommBox Classic S4.

STOP SWITCHING BETWEEN INPUTS TO SEE LESSON CONTENT
Picture in Picture App

- CommBox Picture in Picture allows you to overlay content from another input device like your slot-in PC or Vivi over content on the CommBox Classic like the Whiteboard.
- This allows you to toggle between lots of content quickly and easily during lessons.

SCREEN RECORD LESSONS
Record App

- Record content on the CommBox Classic S4 to share with students after the lesson.

MAKE TEACHING EASIER
WITH COMMBOX TOOLS

CommBox is passionate about classroom innovation and making teaching easier. The Classic S4 comes with many built-in interactive tools, including the ones designed and developed by us, in collaboration with the CommBox Crew:

COMMBOX PLANNER

An overlay app to plan your daily or weekly classes and activities. You can create your own tasks or use a template library. Developed in collaboration with Narromine Public School.
COMMBOX CLOCK, TIMER & STOPWATCH

Place a clock over any content for quizzes and exams. Toggle between digital and analogue. Use the timer and stopwatch for games, activities, and lessons.

COMMBOX POSTERS

Access a growing library of teaching aids and posters, covering topics such as numeracy, literacy, science, nature, geography, languages and more.

COMMBOX CALCULATOR

Simple calculator that you can use to model calculations.

COMMBOX REWARDS

Reward and engage your class with a fun reward tracker. Set goals to inspire the class and track them with a range of fun stickers.

COMMBOX SPINNER

A floating app that randomly selects a name, or input from a list. Colourful, fun and accompanied by sound effects.

COMMBOX PHONEMES

An easy teaching tool to model constructing words with phonemes. Designed to align to the new Australian Literacy Curriculum and built into collaboration with St Joseph's Primary in Mclean NSW. Invite student up to the screen and let them construct words using sounds.

COMMBOX SCOREBOARD

Fun engaging scoreboard for recording house points, table points or scores from games.

COMMBOX QUOTES

Get daily inspiration from the CommBox Quotes app.

WANT MORE APPS?

You can use the CommBox Store to add your favourite apps or web links.

New tools released regularly

WHAT **TEACHERS** THINK

"Our decision to purchase and install CommBox Interactive Touchscreens came about as a direct result of seeing them used at a school exhibition we were involved in, where we were thoroughly impressed by the high resolution quality of the image, the touchscreen's versatility and its compatibility with current and potentially future technology. When our staff members first saw a CommBox panel installed in our facility, not only were they enthused to start using it immediately, the familiar and user-friendly technology the touchscreens employs, meant they could."

Sydney Institute TAFE NSW

"We decided to shift to the CommBox panels as the running costs are lower. We are fed up with replacing lamps and having to wait two weeks when a lamp does go. Not having to clean filters is also a bonus – as this is not always easy to do so in some classrooms. Other factors were that CommBox screens require no calibration and are multi-touch. With our IWBs, we have needed curtains and blinds. This is not the case with the CommBox screens. So price with no on-going costs is a major deciding factor – but it is really all the little things that are just better with the CommBox screens."

John Warby School

"Our teachers & students were so excited to come back after the summer holidays to find every classroom fitted with the latest technology, rather than waiting 3-5 years to refresh technology class by class."

Penola Catholic College

"The addition of the CommBox to our school has made a profound difference to the training and development of our staff and students. The outstanding clarity and resolution of the screen, coupled with the added bonus of being an interactive touchscreen with excellent sound quality, has meant that all participants, regardless of their location in the room have full access to presentations, resulting in much higher engagement levels. Our ability to easily to move the CommBox around on the motorised stand means that we have enjoyed access to this technology in multiple locations within our school."

Birrong Girls High School

"From a pedagogy point of view, touch is really important because it's a native technology, it's one that students and teachers are familiar with and used to so they're used to the idea of pinching to zoom on their computers and to be able replicate that in front of the class is important."

Trinity Grammar, Kew

"We chose the CommBox panels for several reasons. One was on-going costs are much lower than projectors as we do not need to worry about globes. Also the fact that there is no shadowing was a large factor in our decision making process. As we are a special needs school, we rely heavily on touch – and the boards cater well for this. We were also very happy with the ease of supply and installation. The team was very flexible and even willing to come back for some installation tweaks."
